

# MULTI TIER CLOUD SECURITY STANDARD (SS 584:2013)

## CERTIFICATE OF REGISTRATION

**Cert No: Singapore ISC /R65/0402**

THIS IS TO CERTIFY THAT

**Operates an Information Security Management System for Microsoft Windows Azure and Office 365 cloud services including development, operations and support for compute, storage, virtual network and virtual machines services, which complies with Tier 1 requirements of SS 584:2013 (Multi-Tier Cloud Security Standard)**

and has been assessed and registered as complying with Tier 1 requirements of SS 584:2013 for Microsoft Azure Cloud Services and Office 365 services listed as under:

| Azure | Cloud Services (Web & Worker Roles) | Office 365 | Exchange Online       |
|-------|-------------------------------------|------------|-----------------------|
|       | IaaS / VMs                          |            | Sharepoint Online     |
|       | Fabric                              |            | Lync Online           |
|       | RDPE                                |            | Office Online         |
|       | RDOS                                |            | OneDrive for Business |
|       | Batch                               |            |                       |
|       | Service Bus                         |            |                       |
|       | Traffic Manager                     |            |                       |
|       | Express Route                       |            |                       |
|       | Virtual Network                     |            |                       |
|       | Storage (tables, blobs, queues)     |            |                       |
|       | Web Sites                           |            |                       |
|       | Mobile services                     |            |                       |
|       | Notification Hub                    |            |                       |
|       | Media services                      |            |                       |
|       | Workflow Manager                    |            |                       |
|       | Azure Management Portal             |            |                       |
|       | Scheduler                           |            |                       |
|       | Biztalk                             |            |                       |
|       | Right Management Service            |            |                       |
|       | Multi-Factor Authentication         |            |                       |
|       | ADGateway                           |            |                       |
|       | evoSTS                              |            |                       |
|       | SQL Database                        |            |                       |
|       | SQL Server Virtual Machine          |            |                       |
|       | HDInsight                           |            |                       |
|       | SQL VM                              |            |                       |

The locations within the scope of the Certification are **Asia Pacific region** - Singapore, Hong Kong, Japan, Australia **Europe**- Ireland, Netherlands and **United States** - Illinois, Iowa, Texas, California, Virginia (the 8 countries in which the data centers for the above cloud services operate, align with the existing Microsoft ISO/IEC 27001 certification). Further clarifications regarding scope of this certificate and statement of applicability [SOA/R65/0402](#) may be obtained by consulting Windows Azure Compliance team.
